

Welcome

Welcome to the official Aerofly FS 2 Wiki pages.

Your place to find the latest Aerofly FS 2 user manual based on the current Steam version, full step-by-step tutorials and guides for some of the most advanced aircraft, documentation for our SDK tools and development kits for making your very own scenery, aircraft, and even aircraft liveries, and much more. This is your one stop shop for all of your Aerofly FS 2 needs.

Aerofly FS 2 Flight Simulator

Aerofly FS 2 is a new flight simulator, designed to provide users with accurate flight physics, breathtaking photoreal scenery, accurately modeled airports, and real world functionality. Whether you are a beginner sightseeing pilot, or a seasoned airline transport pilot veteran Aerofly FS 2 Flight Simulator has something for you. Aerofly FS 2 can be played in standard mode or in VR mode (prepare for an experience never seen before in VR mode). Aerofly FS 2 Flight Simulator is under continuing development by ipacs, a dedicated team of professionals with a passion and dedication to provide you with the best flight simulator experience possible. Are you ready to soar the skies? Happy Flying

Current Steam Version

The information in this WIKI reflects: **Aerofly FS 2 Update Version 2.04.07.37 (September 6, 2019)**
