

Content Created by Our Users

Using our public and free [Aerofly FS SDK](#) (Software Development Kit) a ton of users created their own aircraft, aircraft repaints, airports, scenery objects, scenery cultivation and aerial images.

User created content should be installed in the [Aerofly FS User Folder](#).

Uploaded to the official IPACS Forum

Aircraft Repaints

[IPACS Forum Repaints](#)

User made aircraft repaints, uploaded to the official IPACS forum.

Scenery Objects

[IPACS Forums Scenery](#)

User made scenery objects made by users and uploaded to the official IPACS forums.

External Links

Here are external links to some of their creations. Please note that IPACS does not have control over the content provided on these pages as they are purely community driven. When experiencing issues like crashes with Aerofly FS please try to uninstall these user made creations first to check if the issue is caused by them.

Scenery

[Flight-Sim.org](#)

Large amounts of user made scenery, even displayed on a [global map](#).

[FS Cloudport](#)

Over 3000 airports with runways, ground objects and vehicles and more, created by users.

Aircraft and Repaints

[Flight-Sim.org](#)

Almost 170 repaints and also some add-on aircraft made by our community.

[Aerofly-Sim.de](#)

Add-on aircraft developed with assistance of and published through one of our IPACS team-members.
