

# I can't get V 2.4.7 on my iOS device

The new update V2.4.7 is compatible with iOS devices. If you have an iPad 4 or iPhone 5 or newer, you can install V2.4.7 via your App Store Account and "Updates". Older iOS devices still use V2.3.5. If you are to get a new iOS device in the future you will get the newest Aerofly FS 2 version automatically by transferring the app to your new iOS device.
