

# I lost my In-Apps?

To restore your former In Apps after an update or a new installation, please follow the instructions below:

- Please click on the green button which is “Restore purchases” and let the app open until the confirmation appears. Because of the data size it can take some time to finish all downloads.
- During this period, please don` t push back the app into the background by returning to the home screen or opening another app.
- Please ensure that you use the same Apple-ID as in your original purchase for AeroflyFS2 and any In-App purchases
- Please check first that you allow aerofly In-App purchases under iOS  
Settings/General/Restrictions
- For Android users, please install the Aerofly FS 2 only in the internal space and not in a SD card.
- Please free up more memory space in your device temporarily if the downloads stop.
